

FRT0000B072

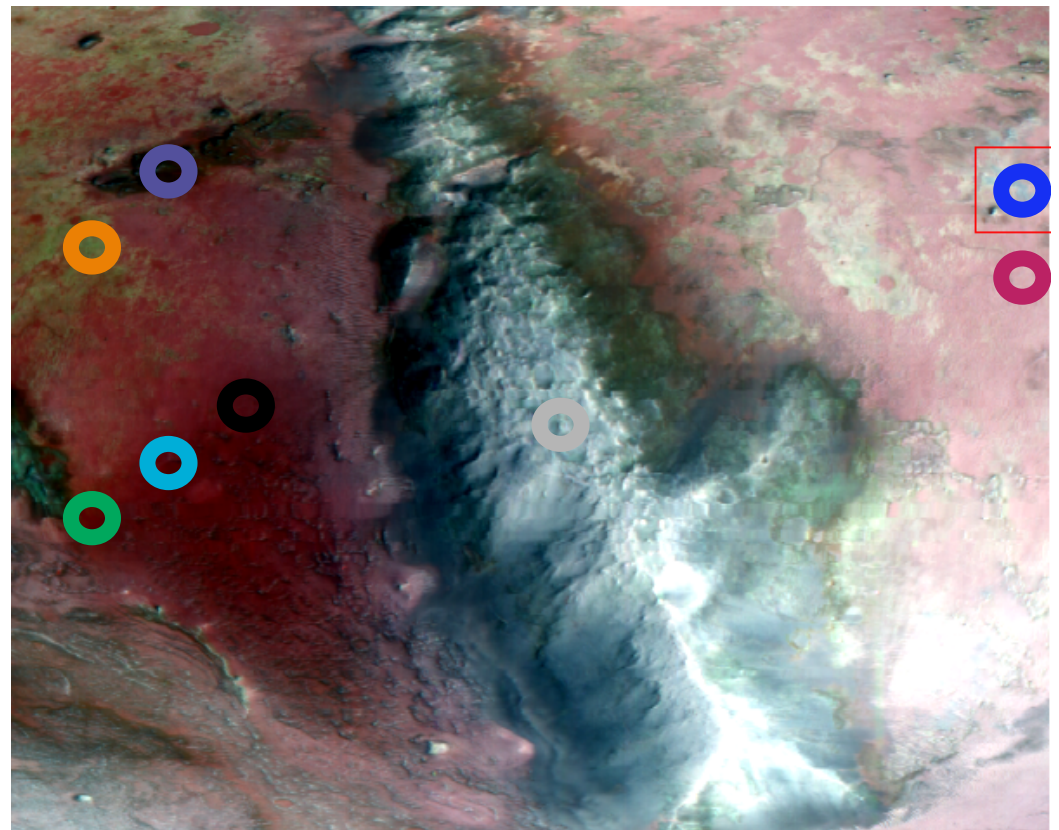

Raw I/F Spectra

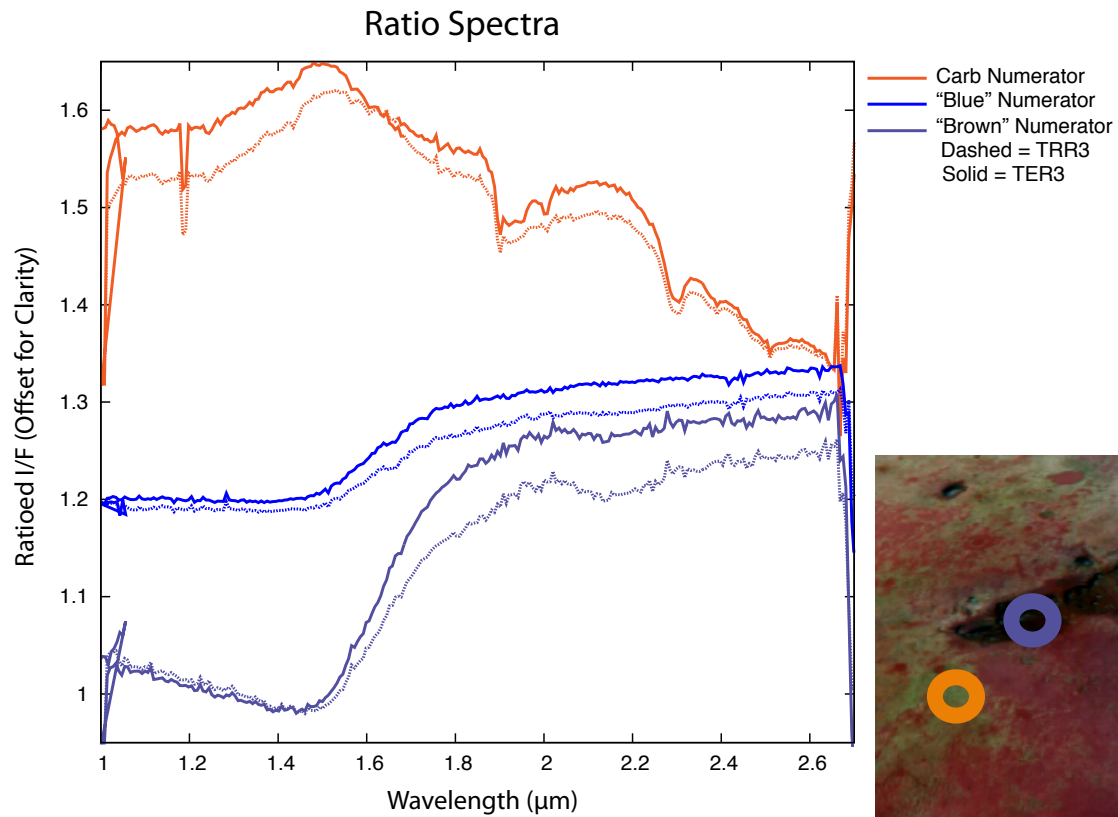

FRT0000B072

Comments

- 1) Significantly better ATM removal at $\sim 2\mu\text{m}$
- 2) Lower "random" noise

Questions:

- 1) What is causing the change in continuum?
- 2) Increased I/F at $\sim 1.8\mu\text{m}$?
 -Empirical ATM correction effect?
